# GENERAL INSTRUCTIONS FOR THE FIELD

1. The first thing to do is to get a good map of the area. This will help you to find the best route to the site and to avoid any obstacles. 2. Next, you should check the weather forecast for the day. This will help you to decide whether or not to go. 3. Then, you should pack your equipment. This should include a first aid kit, a compass, a map, a notebook, a pen, a camera, and some food and drink. 4. Finally, you should get a good night's sleep before you go. This will help you to be alert and ready for anything.
